

EduCore — The School ERP That Pays For Itself In One Term

Print or PDF this. It is the leave-behind after the 20-minute demo (see DEMO-SCRIPT.md). One page, principal-ready.

The problem you know too well

- **Fees leak.** Cash registers, UPI on personal phones, Excel registers that nobody reconciles — and every year, lakhs go missing in the gaps.
- **Parents find out late.** An absence is discovered at 6 pm, not at 9 am. A fee reminder is a Wednesday phone-call ritual.
- **Excel runs the school.** Timetables, report cards, and comparison across campuses all live in one coordinator's spreadsheet — and that person's leave stops the school.

What EduCore does on day one

Your staff does this	EduCore does this
Teacher marks attendance	Parent's phone buzzes within seconds — by name
Office collects a fee (cash or UPI)	Numbered receipt, ledger entry, and the parent's app updates — one trail
Term-end marks entry	CBSE-format report cards published to parents, zero formatting
Coordinator builds a timetable	Clash detection catches the double-booked teacher before students do
Principal asks "how are we doing?"	Dashboard answers: enrollment, collection rate, attendance %, per campus

Built for how Indian schools actually run

- **Multi-branch groups:** one login for the owner, per-campus dashboards, consolidated fee and attendance numbers.
- **Razorpay fee collection** with automatic reconciliation — every online rupee matches a receipt, every mismatch is flagged.
- **Late fees that are fair:** your rules, your slabs, applied nightly, reversed in one click with an audit trail.
- **The parent app** (Android): fees, receipts, attendance, results, class chat, school announcements, push notifications — offline-tolerant.
- **DPDP-compliant from day one:** consent registry, data export, erasure, breach runbook — procurement-ready for 2026.
- **Your data is yours:** isolated per-school database, exportable any time.

Pricing (per student, per year)

Tier	Price	For
Essential	Rs.150	Single-branch schools — attendance, fees, app, reports
Standard	Rs.300	+ timetable, analytics, late-fee automation, exams
Group	Rs.500	Multi-branch groups — consolidated ownership dashboards

One-time onboarding fee covers data import and staff training. Messaging (WhatsApp/SMS) passed through at cost. **A 600-student school on Standard pays Rs.1.8L/year — less than one term of fee leakage.**

Why now

Pilot programs for the coming academic session are limited to a handful of schools per city. Pilot terms run one full term with success criteria agreed in writing (PILOT-AGREEMENT-SKELETON.md).

Next step: book a 20-minute demo ? /request-demo, or write to the pilot desk. Bring one fee register and one timetable — we'll load your real data shape before you decide.
